### 3. Capital Adequacy

#### Qualitative Disclosures:

In accordance with the guidelines of RBI, the bank has adopted standardized approach for credit risk, basic indicator approach for operational risk and standardized duration approach for market risk for computing capital adequacy. Basel III Capital regulations are applicable to Banks in India from 1st April, 2013 and will be fully phased in by 31st March, 2019. Detailed guidelines on Basel III Capital Regulations and Guidelines on Composition of Capital Disclosure Requirements are issued by RBI and consolidated under the Master Circular – Basel III Capital Regulations July 2015.

The transitional arrangements for minimum Basel III capital ratios are given below.

**Transitional Arrangements-Scheduled Commercial Banks  
(excluding LABs and RRBs)**

Minimum capital ratios	(% of RWAs)							
	April 1, 2013	March 31, 2014	March 31, 2015	March 31, 2016	March 31, 2017	March 31, 2018	March 31, 2019

\* The difference between the minimum total capital requirement of 9% and the Tier 1 requirement can be met with Tier 2 and higher forms of capital;

# The same transition approach will apply to deductions from Additional Tier 1 and Tier 2 capital.

Regulatory Capital Adequacy position (as per Basel II & Basel III norms as made applicable by RBI) is assessed periodically. Besides, the bank also assessed its own internal estimate of risk capital based on its Board approved ICAAP policy and Stress Testing Policy to cover the Pillar 2 risks. Risks are assumed in line with the Bank's risk bearing capacity and capability in order to generate yields, taking risk-return frontier into account. This aims to ensure that risks that could jeopardize the Bank's existence are avoided.

i) interest and or installment of principal remain overdue for a period of more than 90 days in respect of term loan accounts

ii) the account remains 'out of order' (the outstanding balance remains continuously in excess of the sanctioned limit/drawing power, in cases where the outstanding balance in the principal operating account is less than the sanctioned limit/drawing power there are no credits continuously for 90 days as on the date of Balance Sheet or credits are not enough to cover the interest debited during the same period) in respect of Overdraft/Cash credit accounts. If the interest due and charged during any quarter is not serviced fully within 90 days from the end of the quarter, the account is classified as NPA.

## b) Credit Risk Management Policy

The bank has in place a Credit Risk Management Policy which is reviewed periodically to bring in refinements triggered by evolving concepts and actual experience.

The Executive level committee – Credit Risk Management Committee (CRMC) which reports to Risk Management Committee (RMC) of the Board, is responsible for the management and mitigation of credit risk in the bank. Credit Risk Management Department and Credit Monitoring Department at Head Office level act as the secretariat of CRMC.

Credit approvals are subject to a well-established and time tested system of competencies, which act as a framework within which decision making individuals or committees are authorized to enter into lending transactions. Responsibility for the approval of loans is dependent on size, security and type of the loan.

Credit rating system is in force using various CRA formats, developed by the Bank to measure the risk involved in each borrower account. All borrowers with an aggregate credit limit of ₹ 25 lakh and above are subjected to borrower rating. Gold loans, Loans against Deposit Receipts, Housing Loans, Loans against NSC & Insurance policies and staff loans are subjected to portfolio rating. Limits above ₹ 2 crore are subject to Facility Rating in addition to borrower rating.

Operations in all credit exposures of ₹ 50 lakh and above are monitored on a monthly basis by Credit Monitoring department to detect delinquency signals at an early date and nurse the account.

Rating migration studies are conducted at regular intervals.

Pricing of corporate exposures is subjected to RAROC analysis based on bank's Board approved Risk Adjusted Return On Capital (RAROC) policy.

Both regulatory capital and economic capital requirements are assessed at the time of credit appraisal of corporate exposures.

## 5. Credit Risk: Disclosures for portfolios subject to standardized approach

### Qualitative Disclosures

In accordance with RBI guidelines, the bank has adopted standardized approach for computation of capital for credit risk.

Bank Loan Ratings of CRISIL, CARE, ICRA and India Ratings are considered for arriving at the capital requirement.

Bank extends external rating of other issues of the borrower to unrated claims only when the issue specific rating maps to Risk Weight higher than that of the unrated exposure.

## 6. Credit Risk Mitigation: Disclosures for standardized approaches

### Qualitative Disclosures

A Credit Risk Mitigation and Collateral Management Policy, addressing the Bank's approach towards the credit risk mitigants used for capital calculation is in place.

Following items are considered for on and off balance sheet netting:

- a) Deposits with specific lien to the facility
- b) Subsidies received (for priority sector advances)
- c) Claims received (for NPA accounts)

Of the eligible financial collaterals, the types of collateral taken by the bank are gold ornaments and bank's own deposit receipts. Gold ornaments are accepted as collateral by branches after due scrutiny and are marked to market value on a daily basis. Bank has made an assessment of market liquidity risk involved in liquidating gold ornaments and is considering a holding period of 21 days for advance against pledge of gold ornaments. In Pillar 1 capital adequacy computations, bank considers a haircut of 22% (after scaling up the standard supervisory haircut of 15% to a 21 day holding period). In addition to this, bank is maintaining extra capital for its gold loan portfolio in Pillar 2 capital computations.

The types of guarantees recognized for credit risk mitigation are guarantee by central government, state government, ECGC and banks (in the form of bills purchased/discounted under Letter of credit).

Collaterals other than financial collaterals that secure the credit portfolio of the bank are land & building, plant & machinery and current assets of the counter party. Land and Building includes commercial building, residential property and vacant land.

## 8. Market Risk in the Trading Book

### *Qualitative Exposures*

Bank has put in place Board approved Market Risk Management Policy, Investment Policy and Foreign Exchange Policy for effective management of market risk of the bank.

Bank's Integrated Treasury manages the trading book. Proprietary trading is done in government securities, equity shares and foreign exchange. Adherence to limits is reported on a monthly basis to the Executive level Asset Liability Committee (ALCO) and Risk Management Committee (RMC) of the Board.

Modified Duration and Value at Risk (weighted historic simulation approach) are the tools used to track market risk in the trading book for interest rate related instruments. For equity exposures bank uses Value at Risk and Portfolio Beta.

Stress tests are conducted on a daily basis on securities in the trading book.

Portfolios covered by standardized approach are government securities, other trustee securities, Non SLR bonds & debentures, Certificate of Deposits and Equity Shares.

### *Qualitative Disclosures*

The Executive level committee - Operational Risk Management Committee (ORMC) which reports to Risk Management Committee (RMC) of the Board, is responsible for the management and mitigation of operational risk in the bank. The bank has framed Operational Risk Management Policy duly approved by the Board. Other policies approved by the board that deal with the different facets of operational risk are Inspection Policy, Human Resource Management Policy, IT Policy, Compliance Policy, Business Continuity & Disaster Recovery Plan and Outsourcing policy.

Bank has obtained Bankers' Indemnity Policy to cover the risk of cash in transit and cash and securities including gold ornaments kept at branches. Risk Based Internal Audit (RBIA) is operational at all the branches.

Bank is adopting Basic Indicator Approach for arriving at capital charge for operational risk in compliance with RBI guidelines and is in the process of building database for moving to Advanced Approaches.

## 10. Interest Rate Risk in the Banking Book

### *Qualitative Disclosures*

The Executive Level Committee - Asset Liability Committee (ALCO) has the overall responsibility of managing the interest rate risk in the banking book of the bank. ALCO fixes the deposit and lending rates of the bank and directs the investment activities of the bank in line with its interest rate view. Limits are fixed from both Earnings and Economic Value Perspective in board approved Market Risk Management Policy and adherence monitored on a monthly basis. Interest Rate Risk from Earnings Perspective is measured through Earnings at Risk (EaR) approach (which computes the impact on NII of various interest rate changes) on a monthly basis. Interest Rate Risk from Economic Value Perspective is measured using Modified Duration Gap Approach on a monthly basis.

The Risk Management Committee of the Board oversees the ALM process of the bank and reviews the decisions taken by the ALCO.

### *Key Assumptions for IRRB calculations*

- a) Bulk of the advance portfolio to re-price within 12 months.
- b) Maturity of deposits considered after adjusting empirically observed premature closure rates.
- c) Core portion of Savings Bank Deposits slotted in 7 to 10 year time bucket.
- d) Core portion of Current Deposits slotted in Above 15 years-time bucket for Modified Duration Gap Analysis (For Earnings at Risk Analysis, Current Deposits are treated as interest non sensitive).

**11. Counterparty Credit Risk**

Counterparty Credit Risk (CCR) is the risk that the counterparty to a transaction could default before final settlement of the transaction's cash flows. An economic loss would occur if the transaction or portfolio of transactions with the counterparty has a positive economic value for the Bank at the time of default. Unlike exposure to credit risk through a loan, where the exposure to credit risk is unilateral and only the lending bank faces the risk of loss, CCR creates a bilateral risk of loss whereby the market value for many different types of transactions can be positive or negative to either counterparty. The market value is uncertain and can vary over time with the movement in underlying market factors.

Capital is maintained on the exposure to CCR as per regulatory guidelines on Capital adequacy computation. The exposure is calculated using Current Exposure Method.

The MTM on client exposures are monitored periodically. The Bank does not recognize bilateral netting for capital computation.

**Leverage Ratio frame work*****Definition and minimum requirement***

The Basel III leverage ratio is defined as the capital measure (the numerator) divided by the exposure measure (the denominator), with this ratio expressed as a percentage

$$\text{Leverage Ratio} = \text{Capital Measure} / \text{Exposure Measure}$$

The public disclosure requirements of leverage ratio will begin from January 1, 2015 and the Basel Committee will monitor the impact of these disclosure requirements. Accordingly, banks operating in India are required to make disclosure of the leverage ratio and its components

from April 1, 2015 on a quarterly basis and according to the disclosure templates as indicated in paragraph 16.7 along with Pillar 3 disclosures.
